

Position Description

Position Title	GIS Technician – Data Maintenance
Reporting to	Data Maintenance Manager
Number of Direct Reports	Nil
Last Updated	May 2010

Company Vision

To be the leading and trusted provider of land information solutions in Australasia and beyond.

Position Summary

You will be a member of our data maintenance team undertaking a range of GIS related data maintenance, capturing data from a range of sources (including imagery, scheme plans, street level video etc.), contributing to the ongoing improvement of Terralink's core datasets.

Responsibilities

In addition to the above, your responsibilities will also include:

- ❖ Contribution to the identification and resolution of system, process, data or administration issues.
- ❖ Assisting in the maintaining of process documentation.
- ❖ Contributing feedback and ideas in relation to new technologies and processes, which will improve the quality of our data, and the service to our clients.
- ❖ Assisting as required with other appropriate tasks and projects across the unit and company.

Person Specification

- ❖ Experience using GIS software applications, concepts and methodologies.
- ❖ Good general computer skills and knowledge.
- ❖ Previous knowledge working with spatial/GIS data.
- ❖ Ability to interpret and capture data from imagery.
- ❖ Good analytical ability and problem solving skills.
- ❖ A high degree of accuracy and quality.
- ❖ Good interpersonal and communication skills.
